Sesame PPO | 3 training seeds × 3 methods
Fixed PPO
Full DR
Fixed-delay DR
Applied target rate RMS (rad/s)
Applied target acceleration RMS (rad/s²)
Actual joint acceleration RMS at 50 Hz (rad/s²)
Raw action clipping fraction
Nominal physics
Randomized physics
Dots: training-seed means (128 paired episodes each). Error bars: sample SD across 3 training seeds, not confidence intervals.
Same evaluation physics for every method; unchanged local reward. Target/joint derivatives sampled at 50 Hz.
